## Introduction:

This certification covers the international standard published by the International Standardization Organization (ISO), that describes how to manage information security in a company. ISO 27001 can be implemented in any kind of organization, profit or non-profit, private, small or large government-owned. It was written by the world's best experts in the field of information security and provides methodologies for the implementation of information security management in an organization.

This standard also allows companies to become certified, which means that an independent certification body has confirmed that an organization has implemented information security compliant with ISO 27001.

### Learning Objectives:

1. Understand the principles, concepts and requirements of ISO/IEC 27001:2013.
2. Identify how to develop an ISMS.
3. Develop skills and the ability to conduct audits.
4. Understand ISO 27001:2013 Annex A.

### Target Audience:

Those who need to know what ISO 27000 is about and how to execute and report on an audit in compliance with ISO/IEC 27001:2013.

### Prerequisites:

There are no formal prerequisites for this certification.

### Training:

- Course Type: Lead Auditor.
- Certification Code: I27001LA.

The course work includes lectures, debates, role-plays, individual and group exercises so that you can begin to understand the ISO 27001 standard. After passing the ISO 27001 Auditor exam, you will have the necessary knowledge to perform effective ISMS audits.

### Certification Exam:

To get the Lead Auditor Certificate a complimentary exam with an open book must be done, supervised by the partner, designed to allow students to demonstrate their understanding of the audit process and the responsibilities of being a lead auditor.

- Language: Spanish.
